

VENTI GROUP ENTERS INTO AN AGREEMENT TO SUPPLY BOINGO WIRELESS WITH ITS LINE OF CORE™ ANTENNAS FOR DAS APPLICATIONS

MIAMI BEACH, Florida, Oct. 27, 2016 /PRLog/ -- Boingo Wireless, the leading DAS and Wi-Fi provider that serves consumers, carriers and advertisers worldwide has acknowledged the superior performance of Venti Group's CORE™ wireless antennas by awarding Venti Group a supply agreement to provide its advanced line of DAS antennas.

Wireless is using antenna technology developed over 60 years ago that is failing to keep pace with the demand for increased data, media, file transfers and call activity. In response to this gap, Venti Group has developed and patented groundbreaking wireless technology and manufacturing techniques that increase wireless capability and capacity to meet the growing demand for more throughput, improved connectivity and increased reliability. CORE™ antennas are industry-leading in their performance and are priced well below today's market levels. This combination of price and performance distances CORE™ from all traditional antennas in the market today.

"The combination of Boingo's global lead in enhancing wireless access and Venti's advanced performing CORE™ antennas supports Boingo's market leading position with carriers and OEMs, enabling global brands to engage with high-value consumers in premier locations", commented Henry Adamany, Venti Group CEO.

Daniel Wojciechowski, Director of Integration and Operations at Boingo commented that Venti offers, "truly great performing antennas (True V-H MIMO) at reasonable prices".

Venti's technology continues to outpace the industry using the finest materials and most advanced manufacturing processes resulting in the most reliable, high performing antennas in the market today. Venti's CORE™ antennas are installed on major carrier networks in the largest venues in the country.

About Venti Group

Venti Group is a Manufacturer and Licensor of Antennas, Coax RF Suppression Sleeves and PIM Technologies. Venti Group owns their

independently developed Wireless Patent families - CORE™ Antennas, SLEEV™ and PIMCONNECT™. CORE™ Antennas are based on Patented Low-Cost Technology and are comprised of a line of Indoor and Outdoor Antennas for Wi-Fi and LTE DAS Applications. CORE™ Antennas are the only antennas designed to optimize network performance. SLEEV™ addresses the unwanted EMI / RFI / PIM emissions that impact antenna signals, radio equipment and chipsets that are the heart of Wireless. PIMCONNECT™ is a series of manufacturing technologies that allow Venti wireless products to have and maintain our superior market leading PIM ratings throughout their useful life. Venti Group is committed to bringing our technologies to the Wireless World to enhance all communications with greater coverage and faster and more reliable data.
